Ufenau invests in the IPP Group

Dusseldorf, May 21, 2024

Ufenau Capital Partners has acquired the IPP Group, a leading German engineering service provider for infrastructure and energy projects based in Kiel. Since 1988, IPP has been a leading engineering company in Northern Germany. With more than 150 professionals at eight locations, the group has established itself as a leading player in its relevant markets, focusing on executing all planning and monitoring phases of critical infrastructure projects, such as road renovations, water and wastewater systems, and hydrogen plants. IPP has a broad base of public sector clients who benefit from its strong track record and relevant technical qualifications.

Through the partnership with Ufenau, IPP intends to expand its current strong position in existing markets through organic growth and will continue to invest in the expansion of its service offerings, staff recruitment, and digitalization. Additionally, in a highly fragmented market with strong demographic development and high demand for succession solutions, IPP will accelerate organic growth through selective acquisitions.

Harro Possel, Managing Director of IPP, explains: "Over the last 30 years, we have built IPP with our personal commitment and focus on the needs of our customers. With Ufenau, we have found a strong partner to further develop our group and play an active role in consolidating the market for infrastructure-focused engineering services. This partnership ensures continuity for our customers and employees."

Ralf Flore, Managing Partner at Ufenau, comments: "IPP has earned an excellent reputation and expertise in the engineering sector. We are convinced that IPP, with its strong management team and professionals, represents the ideal platform for further growth in this dynamic market. We look forward to supporting the company in its next growth phase."

Sancovia initiated the transaction and advised the buyer throughout the transaction process.
